## MASTER PROGRAM APPLICATION

These descriptions are used by underwriters in order to determine property insurance premiums.

**This information is critical. An incorrect classification could result in a substantially higher property rate and premium than should be charged for a correct classification.**

ISO 1	Frame	Building where the exterior walls are wood or other combustible materials, including construction where combustible materials are combined with other materials such as brick veneer, stone veneer, wood iron-clad, stucco on wood
ISO 2	Joisted Masonry	Building where the exterior walls are constructed of masonry materials such as adobe, brick, concrete, gypsum block, hollow concrete block, stone, tile or similar materials, and where the floors and roof are combustible (disregarding floors resting on the ground)
ISO 3	Noncombustible	Building where the exterior walls, floors and roof are constructed of, and supported by, metal, asbestos, gypsum or other non - combustible materials
ISO 4	Masonry Noncombustible	Building where the exterior walls are constructed of masonry materials, as described in
