TPG HOTELS & RESORTS

MASTER PROGRAM APPLICATION

These descriptions are used by underwriters in order to determine property insurance premiums.

This information is critical. An incorrect classification could result in a substantially higher property rate and premium than should be charged for a correct classification.

ISO 1	Frame	Building where the exterior walls are wood or other combustible materials, including construction where combustible materials are combined with other materials such as brick veneer, stone veneer, wood iron-clad, stucco on wood
ISO 2	Joisted Masonry	Building where the exterior walls are constructed of masonry materials such as adobe, brick, concrete, gypsum block, hollow concrete block, stone, tile or similar materials, and where the floors and roof are combustible (disregarding floors resting on the ground)
ISO 3	Noncombustible	Building where the exterior walls, floors and roof are constructed of, and supported by, metal, asbestos, gypsum or other non - combustible materials
ISO 4	Masonry Noncombustible	Building where the exterior walls are constructed of masonry materials, as described in "Joisted Masonry" above, with the floors and roof of metal or other non - combustible materials
ISO 5	Modified Fire Resistive	Building where the exterior walls, floors and roof are constructed of masonry or fire resistive material with a fire resistive rating of one hour or more, but less than two hours.
ISO 6	Fire Resistive	Building where the exterior walls, floors, and roof are constructed of masonry or fire resistive materials having a fire resistance rating of not less than two hours
Other	Please Describe:	

Is any building over 20 years old? If so please provide details on any updates to roof, electrical, plumbing, and HVAC systems:

Is any building under renovation? (Please describe):

Has the applicant completed any building updates with employed personnel? (Please describe):

Additional building comments:
